INTRO

The most complicated thing is simplicity.

Driven by creativity, we design with purpose—crafting spaces that are both ergonomically refined and visually striking. We work closely with developers and architects to collaboratively achieve beautiful standards of living.

Drawing on our extensive knowledge and experience, we offer clients the assurance that their investments deliver optimal value and cost savings through our trusted network.

Providing a great service is our top priority. Our process is designed to pull everything together, often acting as the middleman—translating ideas into architectural drawings, ensuring each trade is accurately working towards the design goal.

We are continuously motivated to achieve the best outcome and feel the order in which things are done is vital to achieving the best results.

PROCESS

DESIGN

Architectural floor plans, design elevations, cross sections and detailed MEP site notes for trades.

SOURCE MANAGEMENT

Survey, quantify and spec materials & furniture for project. Organise samples, manage lead times and logistics.

INSTALLATION MANAGEMENT

Prep & installation management of interiors. Ensure MEP drawings provided by Flintwell are followed. Delivering high standards of prep information to ensure build accuracy.

PROJECT MANAGEMENT

Managing logistics for labour and materials for the build. Project planning, execution and completion, ensuring quality standards and safety.

DESIGN

This service will provide you with working drawings and supporting design proposals. We will discuss the best process with you to match the complexity of your project.

- //Architectural floor plans (AutoCAD .pdf & .dwg files)
- //Furniture design elevations & cross sections
- //MEP (mechanical/electrical/plumbing) plans and elevations
- //Recommended mood board

Please note your quote will vary depending on complexity. Kitchens and bathrooms are more involved than wardrobes for instance. Specific technical planning is required in kitchens for services, appliances, worktops, etc. Bathrooms also require technical planning for concealed framed cisterns, rough valves, niches and detailed tile and grout planning.

Starting from £500 per room

SOURCE MANAGEMENT

Survey, quantify and spec materials & furniture for project. Organise samples, manage lead times and logistics.

- //Access to private price lists from our recommended suppliers
- //Direct communication with suppliers, issuing detailed drawings for pricing
- //Check order forms with suppliers to ensure accuracy & lead time
- //Mood board adjustments as choices develop

Our fee reflects the time, expertise, and product knowledge we contribute to your project, while also giving you access to exclusive trade discounts. However, your overall cost will remain significantly lower than standard retail pricing.

Because of our relationships with trusted suppliers, we're able to secure significant savings that we pass directly on to you. These partnerships also give us full transparency on costs, so we can discuss value and make smart choices together.

Most importantly, we only recommend suppliers who share our design vision and commitment to quality, ensuring you get the best results at the best value.

INSTALLATION MANAGEMENT

Prep & installation management of interiors. Ensure MEP drawings provided by Flintwell are followed. Delivering high standards of prep information to ensure build accuracy. Problem solving, design solutions, decision making.

//Guidance and communication throughout the build

//Provide specific, technical information and direction to trades

//Marking out services for mechanical, electrical, plumbing and structural requirements for wall suspended features

Starting from £500 per room or % of build cost

PROJECT MANAGEMENT

A project managed service where we pull everything together. Managing logistics for labour and materials for the build. Project planning, execution and completion, ensuring quality standards and safety. Highly communicative service that ensures crucial information is delivered between each trade.

There are numerous variables that can make a big impact and without direction, may only become apparent in hindsight. Therefore, this fee often saves you money.

% of build cost

TERMS

You will receive a quote after discussing your project with Flintwell. Your quote is valid for 30 days from date of issue.

Your budget will be discussed in the early stages of your project; we work within these unless guided otherwise.

We will invoice for services in the following stages

Design – issued with completed designs

Source Management – 50% on order, 50% upon satisfactory completion of install

Installation Management – 50% on order, % due upon satisfactory completion of install

Project Management – pre-agreed instalments

Payments are due within 7 days of issued invoice date

Flintwell will only invoice clients for Flintwell direct services unless otherwise agreed. All supplier invoices will be paid by the client directly to the supplier and are subject to their invoice terms which clients will be made aware of prior to financial commitment.
